

**Application No.: 10/689,327**  
**Amendment Dated: October 12, 2004**  
**Reply to Response to Request for Corrected Filing Receipt**  
**dated September 21, 2004**

**REMARKS**

In a Response by the United States Patent and Trademark Office to Applicants' request to correct the filing receipt, the Office stated that it could not comply with Applicants' request to correct the Title of the Invention because such a request must be made in the form of an Amendment according to MPEP 605.02.

By the present Amendment, the specification has been amended to change the "Title of the Invention" to "Methods for Cystic Fibrosis Disease Assessment and Methods for Treating Anaerobic Pleudomonas aeuginosa Biofilms in Cystic Fibrosis Disease." The change merely reflects a preferred form without internal punctuation. Hence, it is believed that this change does not involve any introduction of new matter, whereby entry is believed to be in order and is respectfully requested.

Respectfully submitted,

Denise M. Everett
